HONEY BY FLORAL SOURCE

Aroeira Honey

Dark amber, intense body, low sweetness.

Monofloral honey from the aroeira blossom, a native Brazilian tree. Known for its dark amber color, full body and less pronounced sweetness than lighter honeys, with a lightly woody finish.

Dark amber color

Dense body

Low sweetness

Woody finish

ORIGIN	Aroeira blossom (<i>Schinus terebinthifolia</i>), partner apiaries.
INGREDIENTS	Honey.
PRESENTATIONS	300 g jar · 500 g jar · Bulk (on request)
STORAGE	Store in a cool, dry place away from light. Crystallization is a natural process for honey and does not affect its quality.
REGISTRATION	S.I.F. 7436

Not recommended for children under 1 year of age.

Availability depends on harvest. Check current stock. Nutrition facts and batch data are provided on the label and the report accompanying each shipment.

HONEY BY FLORAL SOURCE

Wildflower Honey

Multifloral, from native Brazilian flora.

Multifloral honey produced from several native floral sources. A balanced, consistent profile across region and harvest — our most versatile honey for retail, food service and industry.

Amber color

Balanced profile

Floral aroma

Versatile use

ORIGIN	Multiple floral sources from native Brazilian flora.
INGREDIENTS	Honey.
PRESENTATIONS	300 g jar · 500 g jar · Bulk (on request)
STORAGE	Store in a cool, dry place away from light. Crystallization is a natural process for honey and does not affect its quality.
REGISTRATION	S.I.F. 7436

Not recommended for children under 1 year of age.

Availability depends on harvest. Check current stock. Nutrition facts and batch data are provided on the label and the report accompanying each shipment.

HONEY BY FLORAL SOURCE

Orange Blossom Honey

Light, floral and delicate.

Monofloral honey from orange blossom. Light color, distinct citrus-floral aroma and mild flavor — one of the most sought-after profiles in Brazilian retail.

Light color

Citrus-floral aroma

Mild flavor

High retail acceptance

ORIGIN	Orange blossom (<i>Citrus sinensis</i>), São Paulo state producing region.
INGREDIENTS	Honey.
PRESENTATIONS	300 g jar · 500 g jar · Bulk (on request)
STORAGE	Store in a cool, dry place away from light. Crystallization is a natural process for honey and does not affect its quality.
REGISTRATION	S.I.F. 7436

Not recommended for children under 1 year of age.

Availability depends on harvest. Check current stock. Nutrition facts and batch data are provided on the label and the report accompanying each shipment.

HONEY BY FLORAL SOURCE

Cipó-Uva Honey

Rare floral source, distinctive profile.

Honey from the cipó-uva blossom, a rarer, short-season floral source. A distinctive aromatic profile suited to premium lines and differentiated-origin products.

Short-season floral source

Distinctive aromatic profile

Differentiated origin

Premium line

ORIGIN	Cipó-uva blossom, limited harvest.
INGREDIENTS	Honey.
PRESENTATIONS	300 g jar · 500 g jar · Bulk (on request)
STORAGE	Store in a cool, dry place away from light. Crystallization is a natural process for honey and does not affect its quality.
REGISTRATION	S.I.F. 7436

Not recommended for children under 1 year of age.

Short, limited harvest. Check availability before placing an order. Nutrition facts and batch data are provided on the label and the report accompanying each shipment.

EXTRACT

Propolis Extract

Green Propolis 30 — amber dropper bottle.

Green propolis extract in a 30 ml amber dropper bottle. Made from selected propolis and neutral grain alcohol.

Green propolis

30 ml amber bottle

Dropper

Neutral grain alcohol

ORIGIN	Brazilian green propolis.
INGREDIENTS	Neutral grain alcohol and propolis.
PRESENTATIONS	30 ml bottle
STORAGE	Store in a cool, dry place away from light. Shake before use.
REGISTRATION	S.I.F. 7436

Check availability and lead times. Nutrition facts and batch data are provided on the label and the report accompanying each shipment.

POLLEN

Bee Pollen

Natural bee pollen, in granules.

Bee pollen collected at partner apiaries and dried for preservation. Sold in granules, in its natural form, with no additives.

Natural granules

Varied colors depending on floral source

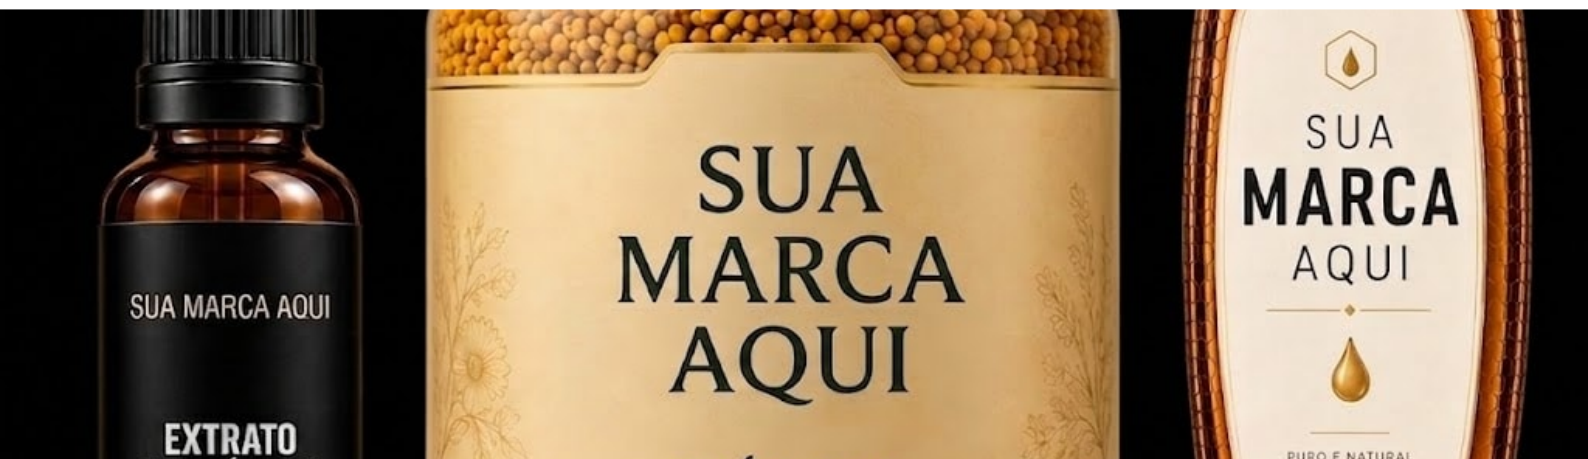

Dried

No additives

ORIGIN	Partner apiaries, mixed floral sources.
INGREDIENTS	Bee pollen.
PRESENTATIONS	250 g jar
STORAGE	Store in a cool, dry place away from light, preferably refrigerated after opening.
REGISTRATION	S.I.F. 7436

Not recommended for people allergic to pollen or bee products.

Availability depends on harvest. Check current stock. Nutrition facts and batch data are provided on the label and the report accompanying each shipment.

SERVICES FOR YOUR BRAND

Our industrial structure, working for you.

Few beekeepers and brands have their own registered facility. We put ours to work for you: you bring the product or the brand, and we handle processing, packaging and documentation — honey, propolis and pollen.

Honey Packaging

Packaging under Federal Inspection.

We package honey at our facility, registered under S.I.F. 7436. Product is received, processed, packaged and batch-identified, with origin records kept at every stage.

- Packaging in jars or drums
- Facility registered under S.I.F. 7436
- Batch control and identification
- Origin records preserved

Private Label

Your brand, our industrial structure.

We produce and package under your brand. You define the product, floral source, packaging and label; we handle processing, packaging, and origin and batch documentation.

- Production under the client's own brand
- Choice of floral source and presentation
- Client's label and packaging
- Batch and origin documentation

Third-Party Packaging

For beekeepers and brands without their own facility.

Beekeepers and brands without a registered facility of their own can process and package with us, using a structure that's already registered and inspected.

- For those without their own facility

- Batch and producer traceability
- Product returned ready for sale

Product Development

From blossom to shelf.

We help define your product: choice of floral source, sensory profile, presentation and packaging format suited to your sales channel.

- Floral source and profile selection
- Presentation definition
- Fit to sales channel
- Samples for approval

Supply for Distributors

Steady volume, consistent standard.

We supply honey to distributors who need a consistent standard and documentation in order. Volumes and terms defined by contract.

- Recurring supply
- Consistent standard per batch
- Origin documentation
- Contract-based terms

Supply for Retail

Shelf-ready product.

We supply markets, specialty shops and chains with packaged, labeled product, ready for display.

- Packaged and labeled product
- Shelf-ready presentations
- Different floral sources
- Scheduled restocking

TALK TO CF HONEY

Buying honey, packaging or private label.

We work with distributors, retail chains, the food industry and beekeepers. We respond with real terms for your volume and channel — this catalog doesn't replace a quote: talk to us for pricing, lead times and minimum volumes.
